

### Features

- 3" x 5" x 1.38" Package
- Ideal for 1U Applications
- Class I and Class II versions
- Up to 275W of AC-DC Power
- Universal Input 90-264 VAC
- Approved to CSA/EN/IEC/UL60601-1, 3<sup>rd</sup> Edition, 2 x MOPP Isolation
- Forced Current Share
- 5V standby and 12V fan outputs
- Inhibit, Power Fail, Output OK Signals
- Efficiency 92% typical
- 3 Year Warranty
- RoHS Compliant

### Description

A Superior performance 275 Watts AC to DC power supply designed for Medical applications. Feature rich and highly Efficient, the MINT1275 product family with active current share for redundant applications can easily fit in 1U chassis, and provides 180 Watts convection cooled or 275 Watts with moving air. Input & output monitoring alarms plus an isolated 12V/1A fan output and 5V standby voltage are among other standard features available in the MINT1275 family. All 5 models are CE marked to the low voltage directive and approved to IEC60601-1 3rd edition.

## Mechanical Drawing

- Notes:**
1. All dimensions in inches (mm), tolerance is +/-0.02".
  2. Mounting holes should be grounded for EMI purposes.
  3. FG is safety ground connection.
  4. The power supply requires mounting on metal standoffs 0.20" (5mm) in height, min.

## Fan Output – J301

J301 provides a 12V@1A output to support a system cooling fan. The fan output is always available when AC input is present, so it also can be used for a 12V standby output is so desired.

## AC Power Failure/DC OK, Current Shaare and Inhibit Signals – J201

### 1. Power fail/DC OK

### 2. Inhibit

Remote inhibit control of the DC output.

J201 pin 5 open = **ON**  
J201 pin 5 LOW or GND = **OFF**

### 3. Current Sharing/Remote Sense

The outputs of N+1 (N=1,2...5) models can be shared. It is shown in Figure 3, one load-share controller is required for each model and circuits are identical when N+ 1 identical models are used.

Terminals J302 and J303 are connected to the Vo+ and Vo-, respectively, of the first power model. The Vo+ and Vo- correspond to the other models positive and negative output pins. The Vo+ connects to positive output bus to the load and Vo- connects the negative output bus to the load.

The J201 pin1 and pin3 connects to the S+ and S-, respectively, of the first power models. The S+ and S- correspond to the other models J201 pin1 and pin3. The S+ connects to positive output bus and S- connects to negative output bus.

#### Remote Sense < 250mV drop compensation:

The J201 Pin4 connects to current sharing bus that it connects to other models J201 pin4.

## Characteristic Curves

### Output vs. Temperature

180W convection cooled and 275W continuous with 200 LFM airflow. Derate output power to 50% at 70°C.

### Efficiency vs. Loading

The high efficiency is achieved by using LLC technology, PFC topology minimizing switching losses. Synchronous SCHOTTKY or ultra-fast diode is used as rectifier in MINT1175 family because of high output voltage level.

## Ripple & Noise

To verify that the output ripple and noise does not exceed the level specified in the product specification. Measured using a scope probe socket with 0.1 $\mu$ F ceramic and a 10 $\mu$ F electrolytic capacitor connected in parallel across it, BW limit with 20MHz.

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
