

Dual-Output, 3-Phase + 1 Phase Quick-PWM Controller for VR12/IMVP-7

MAX17039

General Description

The MAX17039 is a dual-output, step-down, constant-on-time controller for VR12/IMVP-7 CPU core supplies. The controller consists of two high-current-switching power supplies for the CPU and GPU cores. The CPU regulator (regulator A) is a three-phase constant-on-time architecture. The optional 3rd phase is configured with an external MAX8791 or MAX17491 driver. The second GPU regulator (regulator B) is also a constant-on-time architecture with only single phase.

Both regulators A and B include true differential voltage and current sensing to improve load-line and current-limit accuracy. Switching frequencies are independently programmable, allowing 100kHz to 600kHz per phase operation. Output overvoltage protection (OVP), under-voltage protection (UVP), and thermal protection ensure effective and highly reliable operation. When any of these protection features detect a fault, the controller shuts down both channels.

Regulator A includes transient-phase overlap, which speeds up the response time, reducing the total output capacitance. Regulator A also includes active overshoot suppression to further reduce the required output decoupling capacitance.

Both controllers are fully compliant with Intel's VR12/IMVP-7 serial VID communication and control specifications. CPU and GPU outputs are controlled independently by writing the appropriate data into a function-mapped register file. A slew-rate controller allows controlled transitions between VID codes, controlled soft-start. The SVID interface also allows each regulator to be individually set into a low-power pulse-skipping state. Individual phases can be shut down based on the processors' operating conditions to optimize efficiency. The MAX17039 is available in a lead-free, 56-pin, 7mm x 7mm TQFN package.

Applications

VR12/IMVP-7 CPU Core Power Supplies
Voltage-Positioned Step-Down Converters
Notebooks/Desktops/Servers

Pin Configuration appears at end of data sheet.

Features

- ◆ Supports all Required IMVP-7 Functions
- ◆ Three-Phase Quick-PWM™ CPU Core (Regulator A)
 - Two Internal Drivers and One External Driver
 - Active Overshoot Suppression
 - Transient-Phase Overlap Mode
 - Dynamic Phase Selection
 - Phase-Good Fault Detection (Internal)
- ◆ One-Phase Quick-PWM with Internal Driver (Regulator B)
- ◆ Intel VR12/IMVP-7-Compliant 25MHz Serial Interface
- ◆ 8-Bit IMVP-7 DAC
- ◆ $\pm 0.4\%$ V_{OUT} Accuracy Over Line, Load, and Temperature
- ◆ Active Voltage Positioning with Programmable Gain
- ◆ Accurate Lossless Current Balance
- ◆ Accurate Droop and Current Limit
- ◆ Remote Output and Ground Sense
- ◆ Power-Good Window Comparators (VR__READY)
- ◆ Output Current Monitors (IMON_)
- ◆ 4.5V to 26V Battery-Input Range
- ◆ Drives Large Synchronous Rectifier MOSFETs
- ◆ Programmable 100kHz to 600kHz Switching Frequency
- ◆ External Thermal-Fault Detection (VR_HOT#) Output
- ◆ Overvoltage, Undervoltage, and Thermal-Fault Protection
- ◆ Soft-Start and Soft-Shutdown
- ◆ Integrated Boost Switches
- ◆ Low-Profile 56-Lead TQFN Package

Ordering Information

PART	TEMP RANGE	PIN-PACKAGE	FEATURE
MAX17039GTN+	-40°C to +105°C	56 TQFN	3-phase + 1 phase (1 external driver)

+ Denotes a lead(Pb)-free/RoHS-compliant package.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
