

LT3999EMSE

Low Noise Isolated Power Supply

DESCRIPTION

The DC2049A demonstrates how a power supply regulates two output voltage by using the LT[®]3999 and low dropout (LDO) regulators.

The LT3999 is a monolithic push-pull DC/DC driver which features wide input range and small external passive components.

The LT3999 has duty circle control for ΔV_{IN} compensation, which allows for a wide input voltage range and low LDO losses.

The DC2049A employs a push-pull topology that inherently provides a low-noise solution. The design is well suited to noise sensitive systems such as medical instruments, industrial sensing and control, data conversion and wide band communications. The post regulator LDOs reduce output noise further. For more details about the LDOs, please check the LT3065 and LT3090 data sheets.

The DC2049A produces an isolated $12V_{OUT}$ and $-12V_{OUT}$ at up to 200mA each from a 10V ~ 15.5V input voltage range. This board can be modified, by changing the transformer (and duty cycle), to produce other output voltages.

The DC2049A features a small transformer, small inductors and capacitors that work at a 1MHz switching frequency.

The LT3999 data sheet gives a complete description of the part, operation and applications information. The data sheet must be read in conjunction with this demo manual. The LT3999EMSE is assembled in a 10-lead plastic MSE package with a thermally enhanced ground pad. Proper board layout is essential for maximum thermal performance. See the data sheet section Layout Consideration Check List.

Design files for this circuit board are available at <http://www.linear.com/demo/DC2049A>

PERFORMANCE SUMMARY

Specifications are at $T_A = 25^\circ\text{C}$

PARAMETERS	MIN	TYP	MAX	UNITS
Input Voltage Range	10.0		15.5	VDC
Output Voltage 1 (VOUT1)	11.64	12.0	12.3	VDC
Output Voltage 2 (VOUT2)	-12.36	-12.0	-11.64	VDC
Output Current 1	0		200	mA
Output Current 2	0		200	mA
Switching Frequency		1.0		MHz
Isolation		1000		VDC

QUICK START PROCEDURE

DC2049A is easy to set up to evaluate the performance of the LT3999EMSE. Refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

1. Connect Load 1 (positive) between the VOUT1 and GND terminals and another Load 2 (negative) between the VOUT2 and GND terminals.
2. With power off, connect the input power supply to the +VIN and -VIN terminals.
3. Turn the input power supply on and make sure the voltage is between 10V and 15.5V.
4. To measure the output noise, connect one end of a BNC connector J1. Connect the other end of the BNC cable to an oscilloscope with a 50Ω input impedance. Refer to Application Note 70 for more precise techniques for measuring the output noise.

DEMO MANUAL DC2049A

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
