

Mini-Mac Applicator Specification Sheet Order No. 63893-3000

FEATURES

- Directly adapts to most automatic wire processing machines
- Applicator designed to industry standard mounting and shut height 135.80mm (5.346")
- Quick set-up time; plus the crimp height, track and feed adjustments can be set without removing the applicator from the press
- Fine adjustment allows users to achieve target with little effort by adjusting in increments of .015mm (.0006") for conductor crimp height and .063mm (.0025") for insulation height
- Independent adjustment rings allow users to quickly adjust the conductor or insulation crimp height without affecting each other.

SCOPE

Products: 2.36mm (.093") Pin and Socket Crimp Terminal Male and Female Crimp Terminal, 14-18 and 18 Doubles AWG.

Ⓟ For optimum insulation crimp: the following applicators are recommended.								
63893-3000	Applicator is recommended for double crimping two 18 AWG wires, one having a maximum insulation diameter of 4.32mm (.170"), and one having a maximum insulation diameter of 2.79mm (.110"). Single wire crimping may produce a loose insulation crimp.							
Ⓟ63893-3100	Applicator should be used for insulation O.D. 2.36-4.57mm (.093-.180") and 18 AWG SPT-3 wires.							
63893-3200	Applicator is recommended for double crimping two 18 AWG wires, with an insulation diameter of 2.36-3.56mm (.096-.140") each. Single wire crimping may produce a loose insulation crimp.							
Ⓟ63893-3300	Applicator should be used for insulation O.D. 2.36-3.56mm (.093-.140").							

DEFINITION OF TERMS

NOTES

1. Molex recommends an extra perishable tooling kit be maintained at your facility.
2. Verify tooling alignment by manually cycling the press and applicator before crimping under power. Check that all screws are tight.
3. Slugs, terminals, dirt, and oil should be kept clear of work area.
4. Wear safety glasses at all times.
5. For recommended maintenance refer to the Mini-Mac Manual.

CAUTION: This applicator should only be used in a press with a shut height of 135.80mm (5.346"). Tooling damage could result at a lower setting.

CAUTION: To prevent injury, never operate this applicator without the guards supplied with the press or wire-processing machine in place. Reference the press or wire processing manufacturer's instruction manual.

CAUTION: Molex crimp specifications are valid only when used with Molex terminals, applicators and tooling.
