There are various applications besides those listed in the above table, including:

Burglar Alarm, Laundry Machine, Bath, Interphone, Chime, Back Buzzer, ME Instruments, Measuring Instruments, Vending Machine, Calculator, Automobile,

Communication Radio, Hemadynamometer, Thermometer, Running Meter, Facsimile, Audio Timer, Automatic Controlling Devices.

# **Piezoelectric Sound Components**

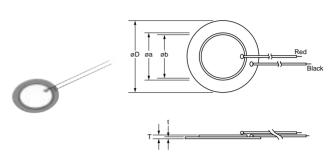

# **Piezoelectric Diaphragms**

# Features

- 1. Clear sound
- 2. Ultra thin and lightweight
- 3. No contacts: therefore, no noise and highly reliable
- 4. Low power consumption for voltage type

## Applications

Clocks/Calculators/Digital camera/Various alarms (Burglar alarms, etc.)

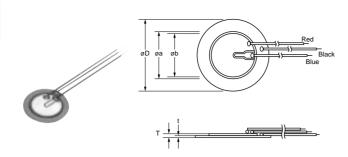

muRata

# **Piezoelectric Diaphragms Notice**

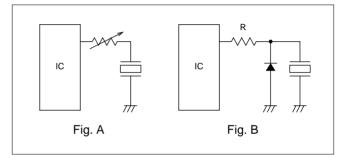

1

#### ■ Notice (Soldering and Mounting)

- 1. Applying load on the center area of the diaphragm may cause cracking in the ceramic element. When the diaphragm is supported by the edge, the load should be applied only around the edge.
- 2. Please consult with Murata or Murata representative if soldering of the component is needed.

## ■ Notice (Handling)

- 1. Please do not touch the component with bare hand because electrode may be corroded.
- 2. The component may be damaged if mechanical stress exceeding specifications is applied.
- Take care to protect operating circuit from surge voltage resulting from excessive force, falling, shock or temperature change.
- If DC voltage is applied to the component, silver migration may occur. Please pay full attention to avoid subjecting the component to DC voltage for long periods.
- The resistor should be used as shown in Fig. A. A suitable resistance value should be chosen, preferably 1kΩ to 2kΩ. Instead of this measure, a diode may also be applied as shown in Fig. B.

6. Avoid excessive pulling of lead wire because wire may break or soldering point may come off.

Note
• This PDF catalog is downloaded from the website of Murata Manufacturing co., ltd. Therefore, it's specifications are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering.

# **Piezoelectric Sound Components**

# **Piezoelectric Sounders External Drive Pin Type**

Microcomputers are widely used for microwave ovens, air conditioners, cars, toys, timers, and other alarm equipment. Externally driven piezoelectric sounders are used in digital watches, electronic calculators, telephones and other equipment. They are driven by a signal (ex.: 2048Hz or 4096Hz) from an LSI and provide melodious sound.

## Features

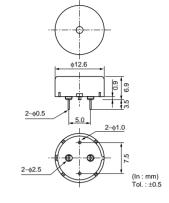

- 1. Low power consumption
- 2. No contacts therefore, no noise and highly reliable

## Applications

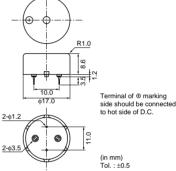

- 1. Various office equipment such as PPCs, printers and kevboards
- 2. Various home appliances such as microwave ovens
- 3. Confirmation sound of various audio equipment

# Piezoelectric Sounders (External Drive Pin Type) Circuit/Notice

## Circuit

## Notice (Soldering and Mounting)

- 1. Notice (Soldering and Mounting)
- (1) Soldering Iron
  - (a) Lead terminals are immersed up to 1.5mm from components body in soldering bath of +260+/-5 degrees C for 10+/-1.0 seconds, and then components shall be left in natural condition for 4 hours.
  - (b) Lead terminal is directly contacted with the tip of soldering iron of +350+/-0.5 seconds, and then components shall be left in natural condition for 4 hours.
- (2) Reflow

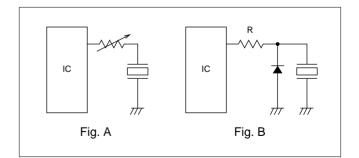

The component cannot withstand reflow soldering.

## ■ Notice (Handling)

- 1. The component may be damaged if mechanical stress exceeding specifications is applied.
- Take care to protect operating circuit from surge voltage resulting from excessive force, falling, shock or temperature change.
- If DC voltage is applied to the component, silver migration may occur. Please pay full attention to avoid subjecting the component to DC voltage for long periods.
- The resistor should be used as shown in Fig. A. A suitable resistance value should be chosen, preferably 1kΩ to 2kΩ. Instead of this measure, a diode may also be applied as shown in Fig. B.

- 2. Washing of the component is not acceptable. Because it is not sealed.
- 3. For Part Numbers mentioned below, please do not insert the component on double sided PCB with plated through hole. When melted solder touches to the base of lead terminal, a part of plastic case shall be melted and it may cause electrical failure.
  - Part Number

PKM13EPYH4002-B0/PKM17EPP-2002-B0 PKM17EPPH4001-B0/PKM22EPPH2001-B0 PKM22EPPH4001-B0/PKM22EPPH4007-B0

Avoid excessive pulling of lead wire because wire may break or soldering point may come off.

# **Piezoelectric Sound Components**

# Piezoelectric Sounders External Drive Pin Type Taping

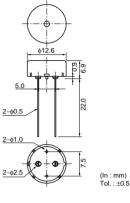

Taking advantage of extensive automatic insertion design technology and materials experience, Murata has developed standard taping type piezoelectric sounders.

This Murata technology supports labor and cost saving activities.

#### Features

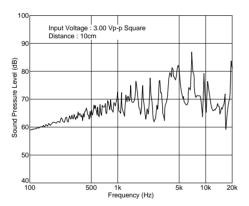

- 1. Lead dimension: Improved mouting reliability (cut & clinch) due to round terminal
- 2. High and stable mountability
- 3. Ammo packaging

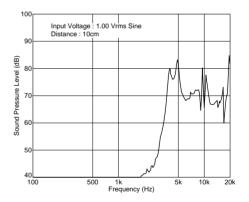

Part Number	Sound Pressure Pressure Level (Ref. only) (dB) (dB)		Operating Voltage Range	Capacitance (nF)	Operating Temp. Range (°C)	Storage Temp. Range (°C)
PKM13EPYH4000-A0	70 min. [3Vp-p,4kHz,square wave,10cm]	70 min. [1Vrms,4kHz,sine wave,10cm]	30.0 Vp-p max.	5.5 ±30% [1kHz]	-40 to +85	-40 to +85

# **Piezoelectric Sound Components**

# **Piezoelectric Sounders External Drive Lead Wire Type**

Microcomputers are widely used for microwave ovens, air conditioners, cars, toys, timers, and other alarm equipment. Externally driven piezoelectric sounders are used in digital watches, electronic calculators, telephones and other equipment. They are driven by a signal (ex.: 2048Hz or 4096Hz) from an LSI and provide melodious sound.

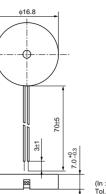

## Features

- 1. Low power consumption
- 2. No contacts therefore, no noise and highly reliable

## Applications

- 1. Various office equipment such as PPCs, printers and keyboards
- 2. Various home appliances such as microwave ovens
- 3. Confirmation sound of various audio equipment

# **Piezoelectric Sound Components**

# **Piezoelectric Ringers (PIEZORINGER®)**

As the result of rapid development of ICs in telephones, demand for piezoelectric sounders as telephone ringers has also rapidly increased. To effectively satisfy this rising demand, Murata provides a suitable piezoelectric sounder called "PIEZORINGER" with the following features.

## Features

- 1. Extremely clear sound
- 2. Since it is voltage driven, the power consumption is quite negligible.
- 3. It can be driven directly from ICs.
- 4. Thin and lightweight

Part Number	Sound Pressure Level (dB)	Sound Pressure Level (Ref. only) (dB)	Operating Voltage Range	Capacitance (nF)	Operating Temp. Range (°C)	Storage Temp. Range (°C)

# **Piezoelectric Sounders (Self Drive) Notice**

## Notice (Soldering and Mounting)

- 1. Notice (Soldering and Mounting)
  - (1) Soldering Iron
    - (a) Lead terminals are immersed up to 1.5mm from components body in soldering bath of +260+/-5 degrees C for 10+/-1.0 seconds, and then components shall be left in natural condition for 4 hours.
    - (b) Lead terminal is directly contacted with the tip of soldering iron of +350+/-0.5 seconds, and then components shall be left in natural condition for 4 hours.
  - (2) Reflow

The component cannot withstand reflow soldering.

## ■ Notice (Handling)

- 1. The component may be damaged if mechanical stress exceeding specifications is applied.
- 2. Take care to protect operating circuit from surge voltage resulting from excessive force, falling, shock or temperature change.
- If DC voltage is applied to the component, silver migration may occur. Please pay full attention to avoid subjecting the component to DC voltage for long periods.

- 2. Washing of the component is not acceptable. Because it is not sealed.
- Please do not cover the hole with tape or other obstacle as this will produce irregular oscillation.
- 4. There should not be any obstacle within 15mm from top of the component as this will produce irregular oscillation.

4. The standard self-driven circuits utilizes transistor switching. Since the circuit constants for hfe of the transistor are optimally chosen to maintain stable oscillation, please design a circuit following the standard.

# **Piezoelectric Sound Components**

# **Piezoelectric Buzzers**

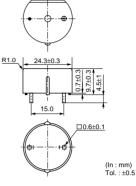

This is a unified piezoelectric sounder which has a piezoelectric diaphragm of 3 terminals connected to a self drive circuit, and it easily generates sound with only a DC power supply (DC3.0-20V). Using suitably designed resonant system, this type can be used where large sound volumes are needed.

# Applications

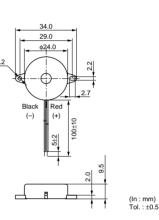

- 1. Gas alarms, burglar alarms
- 2. Air conditioners, microwave ovens and various types of microcomputer controlled home-electronic appliances
- 3. Toys, games, and other simple electronic devices such as teaching aids

# **Piezoelectric Buzzers Notice**

## ■ Notice (Soldering and Mounting)

1. Notice (Soldering and Mounting)

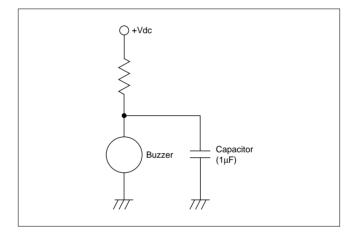

- (1) Soldering Iron
  - (a) Lead terminals are immersed up to 1.5mm from components body in soldering bath of +260+/-5 degrees C for 10+/-1.0 seconds, and then components shall be left in natural condition for 4 hours.
  - (b) Lead terminal is directly contacted with the tip of soldering iron of +350+/-0.5 seconds, and then components shall be left in natural condition for 4 hours.
- (2) Reflow

The component cannot withstand reflow soldering.

## ■ Notice (Handling)

- 1. The component may be damaged if mechanical stress over this specification is applied.
- Resistors should not be connected in series to the power supply as this will produce irregular oscillation. When resistor is necessary to control sound volume, use capacitor (1µF) parallel with the buzzer together.

- 2. Washing of the component is not acceptable. Because it is not sealed.
- Please do not cover the hole with tape or other obstacle as this will produce irregular oscillation.
- 4. There should not be any obstacle within 15mm from top of the component as this will produce irregular oscillation.

3. Please pay enough attention not to pull lead wire too much because wire may be broken or soldering point may come off.

# **Piezoelectric Sound Components Notice**

# ■ Notice (Storage and Operating Condition)

1. Product Storage Condition Please store the products in room where the temperature/humidity is stable. And avoid such places where there are large temperature changes. Please store the products under the following conditions:

Temperature: -10 to + 40 degree C Humidity: 15 to 85% R.H.

2. Expiration Date on Storage

Expire date (Shelf life) of the products is six months after delivery under the conditions of a sealed and an unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because the products may be degraded in solderability due to storage under poor conditions.

Please confirm solderability and characteristics for the products regularly.

- 3. Notice on Product Storage
- Please do not store the products in a chemical atmosphere (Acids, Alkali, Bases, Organic gas, Sulfides and so on), because the characteristics may be reduced in quality, may be degraded in solderability due to the storage in a chemical atmosphere.

- (2) Please do not put the products directly on the floor without anything under them to avoid damp places and/or dusty places.
- (3) Please do not store the products in the places such as: in a damp heated place, in any place exposed to direct sunlight or excessive vibration.
- (4) Please use the products immediately after the package is opened, because the characteristics may be reduced in quality, and/or be degraded in the solderability due to storage under the poor condition.
- (5) Please do not drop the products to avoid cracking of ceramic element.
- 4. Others

Please be sure to consult with our sales representative or engineer whenever the products are to be used in conditions not listed above.

1) The last two digits are changed to M0.

"Minimum Quantity" means the number of units of each delivery or order. The quantity should be an integral multiple of the
"Minimum Quantity". (As for products series with +mark, bulk (bag) quantities shown here differ from actual delivery quantities in a package.)
Please contact nearest sales office for details and for any other products not listed above.

#### △Note:

1. Export Control

<For customers outside Japan> No Murata products should be used or sold, through any channels, for use in the design, development, production, utilization, maintenance or operation of, or otherwise contribution to (1) any weapons (Weapons of Mass Destruction [nuclear, chemical or biological weapons or missiles] or conventional weapons) or (2) goods or systems specially designed or intended for military end-use or utilization by military end-users.

Goods or systems specially <For customers in Japan>

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

- 2. Please contact our sales representatives or product engineers before using the products in this catalog for the applications listed below, which require especially high reliability for the prevention of defects which might directly damage a third party's life, body or property, or when one of our products is intended for use in applications other than those specified in this catalog.
  - (1) Aircraft equipment
    - (2) Aerospace equipment (4) Power plant equipment
  - ③ Undersea equipment
    ⑤ Medical equipment
    ⑦ Traffic signal equipment
- $\check{\textcircled{6}}$  Transportation equipment (vehicles, trains, ships, etc.)
- ⑧ Disaster prevention / crime prevention equipment
- O Data-processing equipment
   O Application of similar complexity and/or reliability requirements to the applications listed above
   O
- Product specifications in this catalog are as of November 2009. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering. If there are any questions, please contact our sales representatives or product engineers.
- 4. Please read rating and 🛆 CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
- 5. This catalog has only typical specifications because there is no space for detailed specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.
- 6. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or a third party's intellectual property rights and other related rights in consideration of your use of our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.
- 7. No ozone depleting substances (ODS) under the Montreal Protocol are used in our manufacturing process.

Общество с ограниченной ответственностью «МосЧип» ИНН 7719860671 / КПП 771901001 Адрес: 105318, г.Москва, ул.Щербаковская д.З, офис 1107

# Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

# http://moschip.ru/get-element

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
