

1 mm Pitch, WtoB, Positive Lock Connector

DF50 Series

■Features

1.Positive lock provides clear tactile click and secure mating

Thanks to the structure at the base of the terminal contacting at the same time as the lock engages, there is a clear tactile click engagement, which enables secure mating.(fig1)

2.Resistant to wrenching forces

The thick and durable housing offers enhanced strength against wall breakage. The deep mating and housings pressed against each other also enhance the strength of the structure against stress.

3.Robust and reliable lance structure

The crimping terminal receiving the lance on both surfaces helps enhance the lance strength.

4.The adsorption area is secured and no need for any adsorption cap

Although compact in size, a sufficient adsorption area is secured and automatic implementation is possible without an adsorption cap.
(* Adsorption cap specification is also available on request)

5.Available for coating external diameter 0.9mm, AWG#28

Although a 1mm pitch, it's also compatible with 0.9mm, UL1061-AWG#28 cable ($\phi 0.127 \times 7$)

Clear tactile click and secure mating

Locking

A clear click engagement generated when locking starts, matching that of the terminal which comes into contact.

(fig1)

Resistant to wrenching forces

A structure that withstands stresses with deep mating. The thick external wall enhances strength against wall breakage.

(fig.2)

Robust and reliable lance structure

The crimping terminal receiving the lance on surface

The lance connection can also be visually confirmed.

■ Usage Recommendations

1.Recommended temperature profile	 Note 1: Up to 2 cycles of Reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle. Note 2: The temperature profile indicates the board surface temperature at the point of contacts with the connector terminals.
2.Recommended manual soldering	Manual soldering: 350°C±10°C for 3 to 4 seconds
3.Recommended screen thickness and open area ratio (Pattern area ratio)	Standard thickness 0.1mm Open area ratios:100%
4.Board warpage	Maximum of 0.02mm at the connector center, with both ends of the connector as reference points.
5.Cleaning conditions	Refer to “Nylon Connector Use Handbook”.
6.Precautions	■ Mating and un-mating of the connectors when not soldered on the boards is not recommended as this may cause deformation of the terminals, damage to the contacts or insulators. ■ When mating/un-mating do not twist or lift by the corners. Apply the forces evenly across the entire length and width of the connectors taking care NOT to damage or deform soldered terminations. ■ Slight discoloration on the insulating materials will not affect form, fit or function of the connectors.
