

TOOL fox

The right tool
for every application

PHOENIX CONTACT – In dialog with customers and partners worldwide

Phoenix Contact is one of the leading manufacturers of electrical connection and industrial automation technology. Founded over 80 years ago, the company now employs 9,900 people all over the world, more than 5,500 of whom are in Germany. A sales network with over 46 subsidiaries and more than 30 additional sales partners guarantees customer proximity directly on-site.

The product range comprises first class components, systems and services for a wide range of applications – the offer ranges right from modular terminal blocks to interface technology, PCB connection methods, solutions for surge protection through to hardware and software solutions for the automation of industrial systems.

Global player with customer proximity

Independence of the company is an integral part of the corporate policy. Phoenix Contact therefore places great importance on in-house competence and expertise: The design and development departments continuously implement innovative ideas in products to develop special solutions to meet customer requirements. Numerous patents emphasize the fact that many products are Phoenix Contact's own developments.

TOOL fox – The right tool for every case

Phoenix Contact offers the complete range of professional processing and measuring tools for all applications in electrical engineering. The tool for cutting, stripping, pressing, crimping, screwing and testing convinces with good handling and excellent quality. Automatic cutting, stripping and crimping

devices are available for automation of steps. Only professional tools facilitate very good results.

Quality, precision, durability and effectiveness are the basis for our tools.

Quality at the tip of your fingers

- Ergonomically designed handles
- Optimal transmission of lever action reduces manual forces by 25%
- Use of high-quality materials with special hardened tool steels that ensure maximum durability

TOOL fox

Tool expertise

The most significant feature
of a professional tool:
It's fun to work with!

Good haptics and ergonomics, durability
and functionality guarantee high levels
of efficiency and quality. The features
are united in all the tools from Phoenix
Contact.

CUTFOX cutting tools are characterized
by especially hardened blades for high
durability, increased force due to optimum
transmission of lever action and slip-free
dual-component handles.

The WIREFOX stripping tools facilitate
quick stripping by means of self-adjusting
blades. This avoids any damage to the
conductor. The ergonomic, light-weight
and glass-fiber-reinforced pliers guarantee
fatigue-free work.

The CRIMPFOX crimping pliers attain
optimum crimping results for all
connectors even for large conductor
cross-sections, with minimum forces.
Equipped with a pressure lock, the pliers
provide uniform high quality and gas-tight
crimping.

Cutting

The process chain starts with the trimming or cutting of conductor or line.

A correct processing of conductors and lines of different size, shape and insulation can be achieved permanently only with quality tools. Low manual exertion of force with maximum exploitation of force in the cutting area is guaranteed by an optimal transmission of lever action. If conductors and lines are to be cut in the upper cross-section range of up to 1400 mm², the choice is limited to cable cutters with ratchet drive. The finely stepped down drives allow the manual force required to be kept to a minimum here too.

Shear cutting

For both versions with direct and indirect power transmission, the specifically designed cutting edge geometries support smooth running and ensure a right-angled and burr-free cut. Accidental deformation of the conductor is thus counteracted. The cutting described above, also called shear cutting, is listed under the generic term "splitting" in DIN 8588. Two blades move towards each other and thus cut (shear) the material without burring.

Bite cutting means two successively moving, wedge-shaped blades cut the material. The wedge angle of the blades is deliberately

Bite cutting

large and thus stable. In addition to the hardening of the entire tool, the cutting area is later on again hardened inductively to 62 HRC. Only this way it is possible to sever even extremely hard materials, e.g. piano wire and spring steel with a tensile strength of up to 2300 N/mm² without damaging the tool. Bite cutting is suitable to a limited extent for cutting through cables and lines.

When used accordingly, the CUTFOX cutting tools from Phoenix Contact have long-term stability and achieve permanently consistent results.

Stripping

Stripping is the next step in the manufacturing process of reliable crimping. A distinction is made between stripping and dismantling.

Stripping is used both as a generic term and to mean removing the insulation of conductors up to 16 mm². Dismantling describes the stripping process for large conductor cross-sections and multi-strand and multilayered lines and cables.

A suitable stripping and dismantling tool removes the insulation sections accurately and quickly. The terminal point or the connector determines the length of the insulation to be removed. This is set using adjustable limit stops and ensures consistent stripping lengths.

When removing the insulation, make sure that the individual inner wires or the braided shield are not damaged. The remaining insulation must not be damaged by the grip pressure, whereby pressure points and color changes on the insulation material as a result are permitted. Further faults that need to be prevented are stipulated in DIN IEC 60352.

For processing special insulation materials, suitable blade geometries depending on the application are deployed. V blades are used for both hard (e.g. Teflon/Radox[®]) and soft ductile rubber insulations (silicone). The V blades cut the insulation all the way round unlike the straight blade geometry, thus reducing the tear-off forces.

It is advisable to use automatic stripping pliers of the WIREFOX pliers series from Phoenix Contact to meet these requirements.

Correctly stripped cable in accordance with DIN IEC 60352

Stripping fault in accordance with DIN IEC 60352

Crimping

Crimping also means the joining of contact and conductor mechanically.

Besides crimping, two more terms are also prevalent in the German-speaking area. The type of deformation plays a decisive role. On the basis of contact types, we distinguish between:

- **Squeezing,**
for insulated cable lugs
- **Pressing,**
for ferrules, non-insulated cable lugs and others

If e.g. flat connectors are processed, it is referred to as crimping.

In order to generate a reliable connection between contact and conductor, some important points must be observed

- Correct connection of the conductor
- Conductor and contact compatible
- Correct positioning of the conductor in the contact

- Choice of suitable crimping tool
- Conductor and contact inserted in the appropriate die nest of the pliers

Professional crimping pliers are always equipped with a releasing pressure lock. It releases as soon as the required crimping pressure is applied. This eliminates the possibility of too little pressure. This guarantees the user a constant crimping result with maximum pull-out values.

If larger series of contacts are processed, automatic or semi automatic crimping machines are often implemented.

For subsequent assessment of crimping results, refer to the regulations DIN EN 60352-2 and 60999-1. In addition to a variety of electrical and mechanical tests, conductor pull-out tests are the decisive criterion.

All tools of the WIREFOX pliers series from Phoenix Contact have been adjusted and tested according to valid regulations. Gas-tight crimping with long-term stability is achieved using these tools. Carefully thought-out mechanics reduce manual forces by 25%.

Unique assignment

A diagram of the connectors to be processed ensures an easy optical allocation.

25% power saving

Innovative mechanics reduce the force by 25%. Even large cross-sections can be safely crimped using little force.

Ergonomic handling

The dual-component handle ensures an optimum hold by means of a soft component with rough texture on the upper handle. The hard component on the lower handle, means that it slides without friction through the hand.

Manufactured precisely

Precisely manufactured dies provide a uniform and high quality during contact processing.

Easy to insert

The stable pliers head with optimal apex angle allows easy insertion of connectors of even larger cross-sections.

Toolless one-hand operation

If required, the pressure lock can be easily accessed for release yet is integrated in the handle to protect it.

Non-slip pressure pad

A non-slip pressure pad for positioning on surfaces can assist the transmission of force.

Conductor pull-out test

Conductor pull-out test according to DIN EN 60352-2

In practice, tractive forces can affect the crimping points during wiring or operation.

Therefore, crimped contacts must be wired correctly to offer a high degree of mechanical reliability. To test the tensile

load capacity, the crimping must withstand a given tractive force relating to the cross-section for over 60 seconds. The tractive force exerts stress on the conductor at the crimping point. Crimping must hold without damage.

The results of the tests for contacts from Phoenix Contact lie above the required minimum values stipulated in the standard.

Conductor cross-section		Pull-out force
mm ²	AWG	N
0.14		18
	24	28
⋮	⋮	⋮
1.0		108
	16	135
⋮	⋮	⋮
6.0		360
	8	370

Minimum pull-out values for ferrules can be taken from DIN EN 60999-1.

Gas-tight

Gas tightness – test set-up based on DIN 50018

The key role of the metal parts of electrical connections becomes particularly apparent in aggressive environments. Corrosion-free contact areas are a prerequisite for low-resistance and thus powerful connections.

This testing method describes a corrosion test in condensation climates with an atmosphere that contains sulphur dioxide. Acidic compounds < Ph 7 form here and attack metal surfaces.

Two liters of distilled water and one liter of SO₂ gas are introduced to the test chamber. At a testing temperature of 40°C during the course of the test, sulphurous acid is formed. After eight hours of testing, the test objects dry for 16 hours with an open door. At the end of the test, a visual inspection of the test objects is conducted. The contact resistance of the contacts is recorded in accordance with

DIN EN 60512-2-1:2002 before and after the corrosion test and checked for changes caused by the effect of corrosion.

When used correctly, crimping tools and connectors from Phoenix Contact create a permanent, gas-tight connection at the contact points that cannot even be impaired by aggressive media.

The voltage drop must not exceed 3.2 mV before or after the test nor must it exceed 1.5 times the value measured at the start of the test.

CUTFOX/UNIFOX

Cutting and universal tools

Phoenix Contact has the perfect CUTFOX cable cutter for every application. There are different designs for processing cables with a diameter up to 100 mm. All parts of the cable cutters that are under particular strain are tempered or especially hardened.

An extensive range of UNIFOX combination tools is available for universal use. The safety tools equipped with non-slip dual-component handles are VDE-tested and marked.

Maximum force transfer

With the ratchet mechanism, the force required in the case of large conductor cross-sections up to 100 mm diameter is extremely low.

Ergonomically designed

An innovative construction and non-slip handles with good grip ensure fatigue-free work.

VDE tested safety

An extensive range of VDE tested combination tools is available for universal use.

CUTFOX cutting tools

Front cable cutter

The front cable cutter ensures optimal cutting results in the cross-section range of a 35 mm diameter (300 mm²) by special cutting tool geometries. Handles with ergonomic grip support fatigue-free work.

Type	Order no.	CUTFOX 12	1212128	CUTFOX 16 VDE	1212126	CUTFOX 18	1212129
Cross-section		up to 12 mm Ø (up to 35 mm ²)		up to 16 mm Ø (up to 50 mm ²)		up to 18 mm Ø (up to 50 mm ²)

MICROFOX

Electronic pliers

MICROFOX – The pliers program for all activities in the electronics and electromechanics field. It is ideal for processing difficult-to-access areas such as PCB components.

Like all manual tools from Phoenix Contact, even the micro-pliers are equipped with specially shaped two-component handles. They ensure safe grip and fatigue-free operation. We recommend that you use the ESD versions with special handles in order to safeguard sensitive electronic components. They discharge the electrostatic loads in a controlled manner as per the prevalent standards and regulations.

Durable

The tools are made of special tool steel C 60, hardened and ground to precision. They thus attain high cutting efficiency and are extremely durable.

Sensitive

The integrated double sheet spring and the ergonomic, non-slip handle enables accurate and delicate processing of electronic components.

Protective

The handles of the MICROFOX... ESD electronic pliers are made of conductive plastic. Electrostatic energy is thus discharged slowly and in a controlled manner.

MICROFOX electronic pliers

Electronic pliers

The MICROFOX electronic pliers have a box joint for constant stability and an optimum force path. The surfaces are finely polished and oiled.

WIREFOX

Stripping tools

The WIREFOX product range provides the perfect tool for every stripping task. The WIREFOX precision stripping tools from Phoenix Contact convince with their ergonomics and the special geometries of the hardened knives. With maximum durability, you will always achieve consistent best results and are excellently prepared for the subsequent crimping procedure.

Precise and safe stripping

WIREFOX stripping pliers strip off all types of conductors and cables quickly, precisely and reliably. The relevant conductor cross-section is set automatically.

Creating conductor pick-off

WIREFOX-D-SHIELD stripping pliers allow cable cutouts and wire pick-offs to be created easily. These pliers are suitable for stripping shielded cables.

Multiple-stage stripping

CUTFOX-D CX stripping tools allow multiple-stage stripping of data and round cables in one step. The central fine setting for the stripping knife ensures that the cable is not damaged.

WIREFOX stripping tools

Stripping pliers for conductors and lines

The WIREFOX stripping pliers are characterized by a mechanism that adjusts automatically to different kinds of insulation and conductor diameters. Particularly useful are the integrated wire cutter and the flexibly adjustable stop for the stripping length.

WIREFOX stripping tools

Stripping pliers for cable cutouts and shield connections

The WIREFOX-D SHIELD is ideal for stripping wires for cable cutouts, wire pick-offs and shield connections.

Type	Order no.	WIREFOX-D SHIELD	1212172	
Conductor / cable diameter	[mm]	8 – 9		
Max. insulation thickness	[mm]	1.2		

Stripping pliers for AS-Interface flat-ribbon conductors

The WIREFOX ASI is ideal for quick and precise stripping of AS-Interface flat-ribbon conductors. The stripping length can be selected freely due to the shape of the pliers.

Type	Order no.	WIREFOX ASI	1212154	
Conductor / cable		AS-Interface flat-ribbon conductor		
Stripping length	[mm]	Any		

WIREFOX dismantling tools

Stripping tools for dismantling

The dismantling tool WIREFOX-D 11 strips single and multicore signal, control and glass fiber wires with diameter up to 11 mm. The handling is extremely easy and guarantees precise stripping results. The WIREFOX-D SR 6 stripping tool is particularly well suited for solar cables.

Type	Order no.	WIREFOX-D 11	1212160	WIREFOX-D SR 6	1212507
Conductor / cable diameter	[mm]	2.5 – 11			
Max. insulation thickness	[mm]	1.0			
Conductor	[mm ²]			2.5 – 6	
Stripping length	[mm]			8.5	

The universal stripping tool WIREFOX-D 13 offers a variety of functions:

- Stripping installation wires of 8 – 13 mm diameter, e.g. NYM 3 x 1.5 mm² up to NYM 5 x 2.5 mm²
- Single-wire stripping 0.2 – 4 mm²
- Integrated slitting knife
- Extendable knife

Type	Order no.	WIREFOX-D 13	1212162
Conductor / cable diameter	[mm]	8 – 13	
Max. insulation thickness	[mm]	–	

In addition to standard cables, fiber optic cables can also be stripped using WIREFOX-D 16. The WIREFOX-D 40 stripping tool dismantles wires with a diameter of up to 40 mm. Round, longitudinal and spiral cuts can be made with the swivel action blade.

Type	Order no.	WIREFOX-D 16	1212173	WIREFOX-D 28	1212174	WIREFOX-D 40	1212161
Conductor / cable diameter	[mm]	4 – 16		8 – 28		4.5 – 40	
Max. insulation thickness	[mm]	–		–		4.5	

Stripping tools for multi-stage stripping of co-axial cables

For extremely simple handling, the CUTFOX-D CX stripping tools facilitate multiple-stage stripping of data and round cables in one step. The central fine setting of the stripping knife means the cable is not damaged.

CRIMPFOX

Crimping tools

The wide range of CRIMPFOX pliers represents a new generation of professional crimping pliers. A new power transmission principle reduces manual forces by 25% with maximum pressure. Optimum handle geometries support fatigue-free work. The integrated pressure lock guarantees gas-tight quality crimping with long-term stability.

Professional crimping

The comprehensive range of professional crimping pliers allows the processing of all contact types up to 120 mm². An innovative construction and ergonomically designed handles reduce the required forces by up to 25%.

Quality crimping

Precise die and an integrated pressure lock guarantee gas-tight quality crimping with long-term stability. The pressure lock releases automatically as soon as the required crimping pressure is attained.

One for all

With replaceable dies, the universal crimping pliers from the CRIMPFOX series allow processing of different contacts up to 120 mm². The dies can be replaced without an additional tool.

Overview of connectors of crimping tools

Ferrules for insulated and non-insulated contacts

	Crimping tool designation	Order no.	Conductor cross-section [mm ²]	Conductor cross-section [AWG]	Page

CRIMPFOX crimping tools

Crimping pliers for ferrules

The CRIMPFOX pliers are fitted with a pressure lock (unlockable). An innovative construction and ergonomically designed handles reduce the required manual forces. The self-adjusting CRIMPFOX 6T die automatically adapts to the connector size.

Type	Order no.	CRIMPFOX 6	1212034	CRIMPFOX 6T	1212037
Conductor	[mm ²] / AWG	0.25 – 6 / 24 – 10		0.25 – 6 / 20 – 10	

Accessories

Spare die	CRIMPFOX 6/DIE	1212035	CRIMPFOX 6T/DIE	1212298
-----------	-----------------------	---------	------------------------	---------

The self-adjusting die with front conductor entry of the crimping pliers automatically adapts to the connector size and is impressive due to a fast and reliable contact processing.

Type	Order no.	CRIMPFOX 6S-F	1212043	CRIMPFOX 6T-F	1212038
Conductor	[mm ²] / AWG	0.5 – 6 / 20 – 10		0.25 – 6 / 20 – 10	

Accessories

Spare die	CRIMPFOX 6S-F/DIE	1212285	CRIMPFOX 6T-F/DIE	1212297
-----------	--------------------------	---------	--------------------------	---------

Great importance has been placed on energy-saving work with the compact crimping pliers. The way in which the handles and the die are arranged means that the ferrules can be fitted however the tool is held.

Type	Order no.	CRIMPFOX 6H	1212046	CRIMPFOX 10S	1212045
Conductor	[mm ²] / AWG	0.14 – 6 / 25 – 10		0.14 – 10 / 25 – 7	

The crimping pliers help in processing ferrules up to 50 mm². The ergonomically formed handles and the optimized mechanical transmission ensure optimum hold and reduce the force needed by 25%.

Type	Order no.	CRIMPFOX 25R	1212039	CRIMPFOX 50R	1212041
Conductor	[mm ²] / AWG	10 – 25 / 8 – 4		35 – 50 / 2 – 1

Flat pin and pin cable lugs, butt connectors

- EASY ENTRY – easy and safe conductor entry
- Hard-soldered crimping zone for maximum pull-out forces
- Electrolytically tin-plated
- Halogen-free

Tool and crimping sets

TOOL DATA SET

Order no. 1208856

Set for cutting, stripping and crimping

consisting of:

- Cable cutter for copper and aluminum with a diameter up to 12 mm, CUTFOX 12
- Stripping tool for stripping multicore signal, control and glass fiber wires of 2.5–11 mm diameter; WIREFOX-D11
- Basic pliers for accommodating dies for different contact types, CRIMPFOX-M
- Die for CRIMPFOX-M, for unshielded RJ45 connectors

TOOL SET ALLROUND 2

Order No 1208843

Set for cutting, stripping and crimping

consisting of:

- Cable cutter for copper and aluminum with a diameter up to 12 mm, CUTFOX 12
- Stripping tool for conductors and cables 0.02–10 mm², WIREFOX 10
- Crimping pliers for ferrules for of 0.14–10 mm², CRIMPFOX 10S

TOOL SET ALLROUND 3

Order No 1208953

Set for stripping, crimping and screwing

consisting of:

- Stripping tool for conductors and cables 0.02–10 mm², WIREFOX 10
- Crimping pliers with integrated pressure lock for ferrules of 0.5–6 mm², with self-aligned die, insertion from the front, CRIMPFOX 6S-F
- Ferrules, 50 pcs. each:
 - Al 0,5-8 WH
 - Al 2,5-8 BU
- Ferrules, 100 pcs. each:
 - Al 0,75-8 GY
 - Al 1-8 RD
 - Al 1,5-8 BK
- Screwdriver for slotted-head screws, SZF 1-0,6X3,5

TOOL-KIT STANDARD

Order no. 1212422

Set for cutting, stripping, crimping and screwing

consisting of:

- Front cable cutter for copper and aluminum with a diameter up to 18 mm (up to 50 mm²) CUTFOX 18
- Stripping tool for stripping wires of 4.5–40 mm of diameter with insulating thickness up to 4.5 mm WIREFOX-D 40
- Stripping pliers for stripping of conductors and cables of 0.02–10 mm² WIREFOX 10
- Crimping pliers for ferrules with self-aligned die, front conductor entry and unlockable pressure lock CRIMPFOX 6S-F
- Screwdriver SZF 1-0,6X3,5

CRIMPSET 6

Order no. 1202072

Assortment box, metal

consisting of:

- Ferrules in accordance with DIN 46228-4: 1990-09, CSA-certified
 - 500 pcs. each:
 - Al 0,25-6 YE
 - Al 0,34-6 TQ
 - Al 0,5-8 WH
 - Al 0,75-8 GY
 - Al 1-8 RD
 - Al 1,5-8 BK
 - 300 pcs.:
 - Al 2,5-8 BU
 - 200 pcs.:
 - Al 4-10 GY
 - 100 pcs.:
 - Al 6-12 YE
- Stripping tool for wires and conductors up to 6 mm²
- Crimping pliers with integrated pressure lock for ferrules of 0.5–6 mm², insertion from the front

AI SORTI BOX RD

Order no. 3202960

Assortment box, red

consisting of:

- Ferrules in accordance with DIN 46228-4, CSA-certified
 - 50 pcs. each:
 - Al 0,5-8 WH, Al 2,5-8 BU
 - 100 pcs. each:
 - Al 0,75-8 GY, Al 1-8 RD, Al 1,5-8 BK

For more assortment boxes, see www.phoenixcontact.net/catalog

Tool sets

Universal tool sets for easy on-site use, with cutting, isolating and test tools from the TOOL fox range. The pouches are made of rugged and sturdy material.

Type	Order no.	TOOL-WRAP	1212505
Tool wrap, equipped with one of the following tools:		CUTFOX 16 VDE	Cable cutter for copper and aluminum conductors, VDE-tested
		CUTFOX-S VDE	Diagonal cutter for copper and aluminum conductors, VDE-tested
		PROFIPOL	Voltage tester, for DC and AC voltages of 6 V to 400 V, IP65
		SZK PH0	Screwdriver, suitable for Phillips recess screws, size: 0
		SZK PH1	Screwdriver, suitable for Phillips recess screws, size: 1
		SZK PH2	Screwdriver, suitable for Phillips recess screws, size: 2
		SZS 0,4X2,5	Screwdriver, flat, blade: 0.4 x 2.5 x 80 mm, length: 161 mm
		SZS 0,5X3,0	Screwdriver, flat, blade: 0.5 x 3.0 x 100 mm, length: 181 mm
		SZS 1,0X4,0	Screwdriver, flat, blade: 1.0 x 4.0 x 100 mm, length: 198 mm
		SZS 1,0X6,5	Screwdriver, flat, blade: 1.0 x 6.5 x 150 mm, length: 248 mm
		UNIFOX-C VDE	Combination pliers, VDE design
		UNIFOX-P VDE	Needle-nose pliers, VDE design
		TOOL-WRAP EMPTY	Tool wrap
Tool wrap, empty		TOOL-WRAP EMPTY	1212501

Type	Order no.	TOOL-BAG	1212504
Tool bag, with laptop and document compartment, equipped with one of the following tools:		AI SORTI BOX RD	Assortment box, with ferrules per 50 pieces: AI 0,5-8 WH, AI 2,5-8 BU, per 100 pieces: AI 0,75-8 GY, AI 1-8 RD, AI 1,5-8 BK
		CRIMPFOX-M SET	Crimping pliers set
		CUTFOX 25 VDE	Cable cutter for copper and aluminum conductors, VDE-tested
		CUTFOX-S VDE	Diagonal cutter for copper and aluminum conductors, VDE-tested
		DUSPOL EXPERT	Voltage tester, for DC and AC voltages of 12 V to 690 V, /750 V DC, IP64
		SZK PH0	Screwdriver, suitable for Phillips recess screws, size: 0
		SZK PH1	Screwdriver, suitable for Phillips recess screws, size: 1
		SZK PH2	Screwdriver, suitable for Phillips recess screws, size: 2
		SZS 0,4X2,5	Screwdriver, flat, blade: 0.4 x 2.5 x 80 mm, length: 161 mm
		SZS 0,5X3,0	Screwdriver, flat, blade: 0.5 x 3.0 x 100 mm, length: 181 mm
		SZS 1,0X4,0	Screwdriver, flat, blade: 1.0 x 4.0 x 100 mm, length: 198 mm
		SZS 1,0X6,5	Screwdriver, flat, blade: 1.0 x 6.5 x 150 mm, length: 248 mm
		UNIFOX-C VDE	Combination pliers, VDE design
		UNIFOX-P VDE	Needle-nose pliers, VDE design
		UNIFOX-WP	Water pump pliers
		USS 4	Control cabinet key, made of metal, for all common control cabinets
		WIREFOX 10	Stripping tool, for lines and conductors from 4 – 16 mm ² , stripping length of up to 18 mm
		WIREFOX-D 40	Stripping tool, for stripping lines of 4.5 - 40 mm, insulation strength up to 4.5 mm
		TOOL-BAG EMPTY	Tool bag, with document and laptop compartment
		Cutter knife	Gray
	Tape measure 3 m		
Tool bag, empty		TOOL-BAG EMPTY	1212500

Tool sets

Type	Order no.	TOOL-CARRIER	1212503
Tool carrier, equipped with one of the following tools:		CRIMPFOX-M	Basic pliers, for accommodating dies for a wide range of contact types
		CRIMPFOX-M 10/DIE	Die, for Crimpfox-M, for ferrules 0.25 - 10 mm ² , serial storage box
		CUTFOX 18	Cable cutter for copper and aluminum conductors
		CUTFOX-S VDE	Diagonal cutter for copper and aluminum conductors, VDE-tested
		PROFIPOL	Voltage tester, for DC and AC voltages of 6 V to 400 V, IP65
		SZK PH0	Screwdriver, suitable for Phillips recess screws, size: 0
		SZK PH1	Screwdriver, suitable for Phillips recess screws, size: 1
		SZK PH2	Screwdriver, suitable for Phillips recess screws, size: 2
		SZS 0,4X2,5	Screwdriver, flat, blade: 0.4 x 2.5 x 80 mm, length: 161 mm
		SZS 0,5X3,0	Screwdriver, flat, blade: 0.5 x 3.0 x 100 mm, length: 181 mm
		SZS 1,0X4,0	Screwdriver, flat, blade: 1.0 x 4.0 x 100 mm, length: 198 mm
		SZS 1,0X6,5	Screwdriver, flat, blade: 1.0 x 6.5 x 150 mm, length: 248 mm
		UNIFOX-CE VDE	Combination pliers, angled, VDE design
		UNIFOX-P VDE	Needle-nose pliers, VDE design
		UNIFOX-WP	Water pump pliers
		USS 4	Control cabinet key, made of metal, for all common control cabinets
		WIREFOX 10 VDE	Stripping pliers, for stripping conductors of up to 10 mm ²
		WIREFOX-D 13	Stripping tool, for stripping lines of 8 - 13 mm
		WIREFOX-D 28	Stripping tool, for stripping lines of 8 - 28 mm
		TOOL-CARRIER EMPTY	Tool carrier
	Cutter knife	Gray	
	Tape measure 3 m		
Tool carrier, empty		TOOL-CARRIER EMPTY	1212499

Type	Order no.	TOOL-BELTPOUCH	1212506	
Tool belt pouch, equipped with one of the following tools:		CUTFOX 18	Cable cutter for copper and aluminum conductors	
		CUTFOX-S VDE	Diagonal cutter for copper and aluminum conductors, VDE-tested	
		PROFIPOL	Voltage tester, for DC and AC voltages of 6 V to 400 V, IP65	
		SZK PH1	Screwdriver, suitable for Phillips recess screws, size: 1	
		SZK PH2	Screwdriver, suitable for Phillips recess screws, size: 2	
		SZS 0,5X3,0	Screwdriver, flat, blade: 0.5 x 3.0 x 100 mm, length: 181 mm

SCREWFOX

Screwdriver and torque screwdriver

The screwdrivers from Phoenix Contact are adapted optimally to the terminal block screws. This and ergonomically designed handles facilitate the transmission of the required torques with adequate force. Finely adjustable torque and battery-powered screwdrivers round off the product range.

Maximum force transfer

Dual-component handles and handles with good grip ensure an optimum hold, thus making work fatigue-free.

Precise torque

The finely adjustable torque allows to customize various screw sizes optimally and ensures constant torque any time.

Battery-powered screwdriver

The extremely accurate battery-powered torque screwdriver, ASD 21 is the ideal one-hand tool for effectively connecting conductors to screw connections.

SCREWFOX screwdriver tools

Screwdriver to actuate spring and quick connection terminal blocks

In addition to their standard applications, the screwdrivers of the SZF series are also suitable for actuating the modular terminal blocks of the ST... and QTC... series.

Type	Order no.		
Blade: 0.4 x 2.5 x 75 mm, length: 156 mm	SZF 0-0,4X2,5	1204504

TESTFOX

Measuring and testing devices

High-quality measuring tools are available with the TESTFOX multimeters, current pliers and voltage testers that are tested and approved as per the nationally and internationally applicable standards. They allow measurement of all standard measurement types and serve as the ideal solution in all fields of application, electrical installation and the service.

Wide range of functions

The TESTFOX M-1 offers all standard measurement types and temperature measurements in a compact housing.

Versatile use

The TESTFOX CC-1 also allows measurement of low AC/DC currents above 10 mA and is ideal in the area of photovoltaics.

Measuring without errors

A load can be connected through two pushbuttons in order to rule out erroneous measurements due to reactive voltage.

TESTFOX testing and measuring devices

The DUSPOL EXPERT voltage and continuity tester has the following features:

- Single-pos. test of the phase conductor (phase)
- Measuring point lighting
- Acoustic and optical continuity test
- Load connection using a pushbutton
- Vibration alarm for safe voltage detection
- Surge voltage category CAT IV 500 V as per IEC/EN 61243-3

Type	Order no.	PROFIPOL	1209101	DUSPOL EXPERT	1209091

Automatic devices

Automatic cutting, stripping and crimping devices

For the automation of steps for flexible and quick processing of conductors and cables, Phoenix Contact offers a comprehensive range of innovative automatic tools. In this way, functionality, quality and quick retooling times ensure high flexibility for consistently high results.

Stripping automatically

Crimping automatically

Stripping and crimping automatically

Automatic devices

The CUTFOX 10 automatic cutting device cuts conductors and lines up to 10 mm². Solid and stranded conductors are cut to within a millimeter. The length and the number of sections are entered via the user-friendly display. The CUTFOX 10 adjusts automatically to the diameter when material is changed.

The automatic stripping device WF 1000 enables automatic stripping with the option of partial stripping of conductors of up to 6 mm² or lines up to 6 mm Ø. The stripping dimensions are individually set via dials and are displayed on the display.

The ZAP crimping pliers are pneumatic pliers for ferrules with a cross-section of 0.25 to 10 mm². Crimping is triggered, depending on the version, via a foot valve or manual release. Two integrated receptacles ensure quick access to the ferrules.

The CF 500 is characterized by a high compression capacity in a compact design. A simple and quick replacement option of dies makes it suitable for processing a variety of contact types of up to 50 mm².

The automatic stripping and crimping device CF 1000 processes loose (bulk) taped ferrules with insulating collars in accordance with DIN 46228-44. Using this machine, conductors can be stripped and fitted with ferrules in one operation.

The automatic stripping and crimping device CF 3000-2,5 processes taped ferrules with insulating collars in accordance with DIN 46228-44. Using this device, conductors in the cross-section range from 0.25 – 2.5 mm² can be stripped and fitted with ferrules in one operation. Modifying automatic devices to different cross-sections is possible within a minute.

Automatic devices

CUTFOX 10 automatic cutting device

The automatic cutting device CUTFOX 10 offers you the possibility to cut various conductors. The desired length and number are entered via a user-friendly display and the automatic device is ready to start.

The front cover only needs to be opened to introduce the conductor ends. The drive and guide rolls are automatically set to the relevant defined diameter.

An application video can be downloaded from the Internet.

Automatic devices

ZAP pneumatic crimping pliers

The ZAP crimping pliers are pneumatic pliers for ferrules with a cross-section of 0.25 to 10 mm². The ZAP 25 has a Duo-Press die, allowing both front and lateral cable insertion.

The ZAP 25 T and ZAP 100 T have been developed especially for preassembly of conductors. The crimping process is triggered by a foot valve. Two integrated receptacles ensure quick access to the ferrules.

Automatic devices

CF 500 automatic crimping device

The compact automatic crimping device CF 500 is impressive due to its high press capacity and the easy replaceability of its dies. The automatic device is an all-rounder due to its large number of dies.

- Ferrules of up to 50 mm²
- TWIN ferrules of up to 2 x 10 mm²
- Insulated cable lugs of up to 6 mm²
- Non-insulated cable lugs up to 6 mm²
- Tube lugs up to 10 mm²
- Slip-on sleeves and flat connectors of up to 6 mm²
- Turned contacts of up to 10 mm²

More dies are available on request or in the Phoenix Contact e-shop. An application video can be downloaded from the Internet.

Automatic devices

CF 1000 crimping machine

The stripping and crimping machine CF 1000 processes loose ferrules with insulating collars as per DIN46228-4. This automatic device can process up to 1200 conductors per hour. In only one work step, the conductor is stripped and quality-crimped with a ferrule. Additional features include:

- Rugged structure
- Processing of loose ferrules (Al...)
- Fast cross-section change without additional setting measures
- Quantity counter
- Suitable for mass processing

Automatic devices

CF 3000 stripping and crimping machine

The automatic stripping and crimping device CF 3000-2,5 processes taped ferrules with insulating collars according to DIN 46228-4. The device covers the cross-section range from 0.25 – 2.5 mm². In just one step, the ferrule is stripped and then immediately processed. The change-over of the automatic devices to different cross-section ranges is possible within a minute.

An application video can be downloaded from the Internet.

Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
