

Safety Padlocks and Kits

Safety is an essential element of risk mitigation throughout the physical infrastructure. Panduit introduces new long body non-conductive padlocks, designed specifically for lockout/tagout applications to help reduce the risk of electrical hazards while providing high security. All Panduit lockout kits, lockout stations, and the group lockout box include non-conductive padlocks, contributing to the protection of employees from unexpected hazards while meeting safety and regulatory requirements. In addition, Panduit offers high security and laminated steel padlocks for application flexibility. These are part of a comprehensive line of safety and facility identification products to optimize workplace safety and aid in compliance.
