

CAT.No.F072-4

# ▶ **Semiconductor Short Form Catalog**

⚠ Although we are constantly making every effort to improve the quality and reliability of our products, there nevertheless remains a certain probability that the semiconductor products may occasionally fail or malfunction. Please take careful precautions against product failures or malfunctions to avoid any injuries, fire accidents or social loss by implementing safety designs such as redundancy designs, designs for fire spread prevention, and designs for preventing malfunctions.

⚠ Our semiconductor products listed in this document are not designed or manufactured to be used in devices or systems requiring extremely high levels of quality and reliability, or the failure or malfunction of which may directly threaten human lives or cause injury. In the cases where the products are to be used in devices or systems for special applications or devices or systems for specialized applications shown below, always make sure to consult us in advance.

#### **Special Applications**

Transportation device (automotive, marine, etc), communication devices for core network, traffic signal devices, fire prevention/anticrime devices, various safety devices, medical devices, etc.

#### **Specialized Applications**

Nuclear power control systems, aircraft and aerospace devices, submarine relay devices, and systems for preserving life, etc.

Even if it is not for a special or specialized application, when IC products are to be used for devices or systems that are desired to last for a long period under continuous operation, please make sure to consult us in advance.

**RECTIFIER DIODES**

# SIDAC (Silicon Diode for Alternating Current)

## SIDAC (Bi-Directional Device)

- **Features**
  1. Symmetrical characteristics.
  2. Operating directly from the AC mains, and can be used in all kinds of pulse generating circuits.
  3. The glass passivation ensures high reliability.
- **Applications**
  1. Pulse generation: gas igniters, HID(high intensity discharge) lamp drive circuit, etc.
  2. AC switching: drive circuit for switching power supplies, voltage detecting circuits, etc.
  3. Over voltage protection: AC line surge protection, capacitor rupture prevention, etc.

Spec Code 4□□□ (See page 46 for the last 3 digits of the Spec Code)

## SIDAC (Uni-Directional Device)

- **Features**
  1. Uni-directional characteristics.
  2. Smaller package than bi-directional SIDAC.
  3. Switching operation from DC power for pulse generation.
  4. The glass passivation ensures high reliability.
- **Applications**
  1. Pulse generation: gas igniters, negative ion generators, HID (high intensity discharge) lamp drive circuit, etc.
  2. Over voltage protection: DC line surge protection.

# Surge Absorbers

## Varistors

- **Features**
  1. Bi-directional surge absorption is possible.
  2. Low junction capacitance.
- **Applications**
  1. Telephone set surge absorption.
  2. Digital communications circuit surge absorption.
  3. ISDN terminal surge absorption.

## Trankillers

- **Features**
  1. High speed response.
  2. Absorption energy tolerance capacity.
  3. Narrow clamping voltage width.
- **Applications**
  1. IC protection for telephones.
  2. IC protection against abnormal voltage.
  3. Protection for load dump noise.

# Power Clampers

- **Features**
  1. High speed response.
  2. Absorption energy tolerance capacity.
  3. Narrow clamping voltage width.
  4. Reverse blocking type.
- **Applications**
  1. Snubber circuit in the primary side of switch-mode power supplies.

# Thyristor Surge Suppressors

- **Features**
  1. Bi-directional or uni-directional characteristics.
  2. High speed response.
  3. Large surge current capacity.
  4. Repetitive use against surges is possible.
- **Applications**
  1. Lightning surge adsorption for communications circuits.
  2. Lightning surge adsorption for transmitters and switchboards.
  3. Surge protection for ISDN terminals.

## Power ICs for Interface

- **Outline** The MTA Series is monolithic power ICs best fit for use as needle print head drivers of dot matrix printers, and as stepping motor drivers.
- **Features**
  1. The input is TTL and CMOS compatible
  2. Large output I<sub>C</sub>=2A, V<sub>CE</sub>=60V or 80V
  3. Insulated type single in-line packaging with heatsink installed
- **Applications**
  1. Head driver for dot matrix printers, ECR and time recorders
  2. Stepping motor drive for printers, typewriters, FAX, PPC and XY plotters
  3. Driver for all types of solenoids, and displays (LED, etc.)

## DC-DC Converter Power ICs

### Outline

The MD Series is a non-isolated, PWM control stepdown DC-DC converter power IC whose MOSFET and drive circuit IC chip integration eliminates the complexity of power supply circuit design. Two rectification systems are available: flywheel Schottky diode type and highly efficient synchronous rectification MOSFET type. A high-performance power supply can be easily realized by choosing a suitable MD chip. The MD Series is available in SMD type HSOP28, SSOP32, LSSOP26, and SOP8 packages.

### Features

- High-efficiency**  
The MD Series consists of a matched control IC and main switching MOSFET in a single package, which allows the construction of a highly efficient power supply with little switching loss and wiring loss.
- Switching Frequency**  
Choose the switching frequency matched to the usage conditions from among 250kHz fixed type, 100kHz/300kHz switched type, and 100kHz to 500kHz adjustable type.
- Protection Functions**  
The MD Series has overcurrent protection, thermal shutdown, undervoltage lockout (UVLO) and etc.

## Partial Resonance Power Supply ICs : MR series

- **Outline**      The MR series is Partial Resonance Power Supply IC modules featuring standby mode operation for very low power consumption. A main switching device and a control circuit are incorporated in a single package. Highly efficient and low noise power supplies can easily be designed with a minimum number of external components using the MR series IC.
- **Features**
  1. Burst mode operation for very low standby power  
Ex. MR1521 in 100V AC main, 12V, 3.5A power supply: Pin=0. 1W at no-load
  2. High efficiency, low noise
  3. No start-up resistance is required
  4. Over current protection
  5. Over voltage protection
  6. Thermal shutdown

**NAMING/OUTLINE OF PACKING FORM**

**ORDERING QUANTITY AND PACKING FORM**

**CODE NO. (TAPING)**

**LEAD FORMING**

# Naming/Outline of Packing Form .....

## 1. Indication of Spec Codes when ordering

Please specify the Spec Code (& the Forming Code) when ordering semiconductors.

**Example 1** Ordering 7001 (short lead) type of S1VB60  
S1VB60-7001

**Example 2** Ordering 7002P5 (5mm pitch, w/kink) type of D2L20U  
D2L20U-7002P5

## 2. Type No.

**Example 1** D 1 N    
Reverse voltage divided by 10

**Example 2** 2 S K 2 6 6 3  
JEITA Classification  
2SK: MOSFET  
JEITA No.

## 3. Spec Code

The code specifies each packing form, lead forming and terminal plate material.

### Example

5 0 0 0

Terminal forming  
0 : Straight terminal  
1 to 9 : Each number shows type of form

In case of surface mounting devices  
6 : Small reel  
7 : Large reel

In case of axial devices  
6 : Lead length 52mm (T52)  
7 : Lead length 26mm (T26)  
8 : Radial taping

Minimum packing unit  
0 : Bulk, tray or taping  
1 : Magazine

Terminal plate material  
3 : Ni/Pd/Au  
4 : Ni or Ag  
5 : Sn-Ag-Cu, Sn, Ag, Sn-Cu  
6 : Sn  
7 : Sn-Bi

## 4. Minimum packing unit

- **Bulk:** The form in which parts are inserted into plastic bags or cardboard boxes.
- **Tray:** The form in which parts are inserted into containers made of resin.

- **Magazine:** The form in which parts are inserted into resin cartridges designated for automatic inserters.

## ■ Tape & Reel

## ■ Taping: Horizontal Taping(T52, T26)

## ■ Taping: Radial Taping

## 5. Packing Quantities

See the following pages for the quantity and the weight of each standard packing unit.

## 6. Packing Box Dimensions

See the following pages for the dimensions of each cardboard box.

# Lead Forming

## Axial type diode

Standard forming types are configured using two codes, a spec code first and then the forming code.  
Complete code example would be 5002P5. (As for details, please refer to the outline dimensions in each specification sheet.) [Unit: mm]

Spec Code		□001	□002	□003	□004
Forming Code	Package				
P5	AX06 AX078 AX10				
P7.5	AX10 AX14				
P10	AX06 AX078				
P12.5	AX06 AX078 AX10				
P15	AX06 AX078 AX10 AX14				
P20	AX10 AX14				

\* Tolerance is  $5^{+0.5}_{-1.0}$  for AX14 products ( $\phi$  1.4mm)  
The initial digit of the Spec Code varies. See the remarks to each product.

# SIP Bridge Diodes

(As for details, please refer to the outline dimensions in each specification sheet.) [Unit: mm]

## Данный компонент на территории Российской Федерации

### Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
