MX6 SQUARE lenses for CREE MX-6 LEDs

- Specially designed for CREE MX-6 series of LEDs
- Special care taken to make a uniform white or warm white illumination.
- Lens material optical grade PC with high UV and temperature resistance(130°C/220°F)
- Best available optical efficiency, up to >90%, with an extremely good cutoff of light
- Integrated holder. Fastening to heat sink with a PU foam adhesive tape of automotive grade. Please check fastening details from this link: (http://www.ledil.com/datasheets/DataSheet_TAPE.pdf)
- We advise customer to ensure the suitability and sufficiency of the bond in the end product. For example, mechanical stress, vibration and holes on the surface of the circuit boar weaken the strength of the tape.

***) IMPORTANT NOTICE:**

REAL SPOT lens is a highly efficient pure collimator lens, which optically functions in an excellent way, giving a high intensity. REAL SPOT lens also reveals the chip level optical structure of the LED. We recommend REAL SPOT lens ONLY for applications, where light intensity is of highest priority, while we do not recommend it for applications, where color uniformity and aesthetics are of high importance.

SMOOTH SPOT lens is a pure collimator lens with light mixing properties. It smoothens the beam pattern and makes a uniform color distribution over the whole beam angle. Light intensity is lower than for the REAL SPOT lens. SMOOTH SPOT lens is recommended for white light applications, where pleasant, high-quality illumination is wished.
