

F100324

Low Power Hex TTL-to-ECL Translator

General Description

The F100324 is a hex translator, designed to convert TTL logic levels to 100K ECL logic levels. The inputs are compatible with standard or Schottky TTL. A common Enable (E), when LOW, holds all inverting outputs HIGH and holds all true outputs LOW. The differential outputs allow each circuit to be used as an inverting/non-inverting translator, or as a differential line driver. The output levels are voltage compensated over the full -4.2V to -5.7V range.

When the circuit is used in the differential mode, the F100324, due to its high common mode rejection, overcomes voltage gradients between the TTL and ECL ground systems. The V_{EE} and V_{TTL} power may be applied in either order.

The F100324 is pin and function compatible with the F100124 with similar AC performance, but features power dissipation roughly half of the F100124 to ease system cooling requirements.

Features

- Pin/function compatible with F100124
- Meets F100124 AC specifications
- 50% power reduction of the F100124
- Differential outputs
- 2000V ESD protection
- -4.2V to -5.7V operating range

Ordering Code: See Section 8

Absolute Maximum Ratings

Above which the useful life may be impaired. (Note 1)

If Military/Aerospace specified devices are required, please contact the National Semiconductor Sales Office/Distributors for availability and specifications.

Storage Temperature (T_{STG}) -65°C to $+150^{\circ}\text{C}$

Maximum Junction Temperature (T_J)
 Ceramic $+175^{\circ}\text{C}$
 Plastic $+150^{\circ}\text{C}$

V_{EE} Pin Potential to Ground Pin -7.0V to $+0.5\text{V}$

V_{TTL} Pin Potential to Ground Pin $+6.0\text{V}$ to -0.5V

Input Voltage (DC) V_{EE} to $+0.5\text{V}$

Output Current (DC Output HIGH) -50 mA

ESD (Note 2) $\geq 2000\text{V}$

Recommended Operating Conditions

Case Temperature (T_C)

Commercial 0°C to $+85^{\circ}\text{C}$
 Military -55°C to $+125^{\circ}\text{C}$

Supply Voltage (V_{EE})

Commercial -5.7V to -4.2V
 Military -5.7V to -4.2V

DC Electrical Characteristics

$V_{EE} = -4.2\text{V}$ to -5.7V , $V_{CC} = V_{CCA} = \text{GND}$, $T_C = 0^{\circ}\text{C}$ to $+85^{\circ}\text{C}$ (Note 3)

Note 1: Absolute maximum ratings are those values beyond which the device may be damaged or have its useful life impaired. Functional operation under these conditions is not implied.

Note 2: ESD testing conforms to MIL-STD-883, Method 3015.

Note 3: The specified limits represent the "worst case" value for the parameter. Since these values normally occur at the temperature extremes, additional noise immunity and guardbanding can be achieved by decreasing the allowable system operating ranges. Conditions for testing shown in the tables are chosen to guarantee operation under "worst case" conditions.

Note 1: F100K 300 Series cold temperature testing is performed by temperature soaking (to guarantee junction temperature equals $-55^{\circ}C$), then testing immediately without allowing for the junction temperature to stabilize due to heat dissipation after power-up. This provides "cold start" specs which can be considered a worst case condition at cold temperatures.

Note 2: Screen tested 100% on each device at $-55^{\circ}C$, $+25^{\circ}C$, and $+125^{\circ}C$, Subgroups 1, 2, 3, 7, and 8.

Note 4: Guaranteed by applying specified input condition and testing V_{OH}/V_{OL} .

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
