The Microtips Customized LCD module, model: NMTC-S16100XFYHSAY-16 is compliant with RoHS

1. GENERAL SPECIFICATIONS

Operating Temperature.	:	Min. -20°C ~ Max. 70°C
Storage Temperature.	:	Min. -30°C ~ Max. 80°C
Display Format	:	16 Characters x 1 line
Character Size	:	3.1 mm x 6.59 mm
Character Pitch	:	3.77 mm
Dot Size	:	0.58 (W) mm × 0.78 (H) mm
Dot Pitch	:	0.63 (W) x 0.83 (H) mm
Outline Dimensions	:	80.0 (W) x 36.0 (H) x 14.5 max. (D) mm
Weight	:	N/A
LCD Type	:	STN / Yellow Green Mode / Transflective
Viewing Direction	:	6:00
Backlight Color	:	Array LED (Yellow Green)
LCD LSI	:	ST 7066
Drawings	:	As attached drawings

Product Specification	Model	NMTC-S16100XFYHSAY-16	Rev. No.	Issued Date.	Page.
			A	Sept. 05, 17	5 / 28

2. ELECTRICAL SPECIFICATIONS

2.1 Absolute Maximum Ratings

Item	Symbol	Min.	Max.	Unit	Note
Power Supply for Logic	$V_{DD} - V_{SS}$	-0.3	7.0	Volt	--
Power Supply for LCD	$V_{DD} - V_o$	0	15.0	Volt	--
Input Voltage	V_{IN}	-0.3	$V_{DD} + 0.3$	Volt	--
Supply Current for LED backlight	I_{LED}	--	220	mA	--

Note: Operator should be grounded during handling LCM.

2.2 Environmental Absolute Maximum Ratings

Item	Normal Temperature				Wide Temperature			
	Operating		Storage		Operating		Storage	
	Max,	Min.	Max,	Min.	Max,	Min.	Max,	Min.
Ambient Temperature	0°C	+50°C	-20°C	+70°C	-20°C	+60°C	-30°C	+70°C
Humidity(without condensation)	Note 2, 4		Note 3, 5		Note 4, 5		Note 4, 6	

Note 1: $T_a \leq 50^\circ\text{C}$: 80% RH max

Note 2: $T_a > 50^\circ\text{C}$: Absolute humidity must be lower than the humidity of 85% RH at 50°C

Note 3: T_a at -20°C will be < 48hrs at 70°C will be < 120hrs when humidity is higher than 70%.

Note 4: Background color changes slightly depending on ambient temperature. This phenomenon is reversible.

Note 5: $T_a \leq 70^\circ\text{C}$: 75RH max

$T_a > 70^\circ\text{C}$: absolute humidity must be lower than the humidity of 75% RH at 70°C

Note 6: T_a at -30°C will be < 48hrs, at 80°C will be < 120hrs when humidity is higher than 70%.

4. I/O TERMINAL

Pin Assignment

Pin no.	Pin out	Description
1.	V _{SS}	Ground
2.	V _{DD}	Logic Circuit Power Supply
3.	V _O	Power Supply For LCD Panel
4.	RS	Data / Instruction Register Select
5.	R/W	Read / Write Select
6.	E	Enable Signal
7. ~ 14.	DB0 ~ DB7	3 – State I/O Data Bus
15.	BKL1	Power Supply for Backlight. See JUMPER EXPLANATION below. 100V / 400Hz AC for EL, 4.2V or 120 ~ 180mA DC for LED backlight Don't care if no backlight
16.	BKL2	

JUMPER EXPLANATION

1. JP2 and JP3 are both short: Pin15 is short with pin2 and pin16 is short with pin1. Backlight powered up via V_{DD} (pin2) and V_{SS} (pin1). Customer does not need to supply power to pin15 and pin16.
2. JP2 short and JP3 open: Pin 15 is short with Pin2 and pin16 is NOT short with pin1. Backlight is powered with V_{DD} (same as logic circuit) and customer should keep pin 15 floating or connected to V_{DD}. Customer could control the backlight independently ON or OFF with pin16 L or H.
3. JP2 open and JP3 short: Pin 15 is NOT short with pin 2 and pin16 is short with pin1. Backlight is common VSS with logic and customer should keep pin16 floating or connected to GND (V_{SS}). Customer could control the backlight ON or OFF with pin15 H or L
4. JP2 and JP3 are both open: The backlight is fully independent with the logic, control the backlight via pin15 / pin16 or A / K.
5. J1 short: Bezel and screw holes connected to GND. J1 open: Bezel and screw holes floating
6. Never change the J2 and J3, it may burn off your system.

Note: J1, JP2 and JP3 are #0805 0 ohm resistors on the rear side of the PCB

8. COMMANDS DESCRIPTION

Clear Display

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
0	0	0	0	0	0	0	0	0	1

Clear all the display data by writing "20H" (space code) to all DDRAM address, and set DDRAM address to "00H" into AC (address counter). Return cursor to the original status. namely, bring the cursor to the left edge on first line of the display. Make entry mode increment (I/D = "1").

Return Home

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
0	0	0	0	0	0	0	0	1	*

Return Home is cursor return home instruction. Set DDRAM address to "00H" into the address counter.

Return cursor to its original site and return display to its original status, if shifted. Content of DDRAM is not changed.

Entry Mode Set

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
0	0	0	0	0	0	0	1	I/D	SH

Set the moving direction of cursor and display.

I/D: Increment / decrement of DDRAM address (cursor or blink)

When I/D = "High", cursor/blink moves to right and DDRAM address is increased by 1.

When I/D = "Low", cursor/blink moves to left and DDRAM address is decreased by 1.

* CGRAM operates the same as DDRAM, when read from or write to CGRAM.

SH: Shift of entire display

When DDRAM read (CGRAM read/write) operation or SH = "Low", shift of entire display is not performed.

If SH = "High" and DDRAM write operation, shift of entire display is performed according to I/D value (I/D = "1", shift left, I/D = "0": shift right).

Messrs. Standard					
Product Specification	Model	NMTC-S16100XFYHSAY-16	Rev. No.	Issued Date.	Page.
			A	Sept. 05, 17	16 / 28

Display ON/OFF Control

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
0	0	0	0	0	0	1	D	C	B

Control display / cursor / blink ON/OFF 1 bit register.

D: Display ON/OFF control bit

When D = "High", entire display is turned on.

When D = "Low", display is turned off, but display data is remained in DDRAM.

C: Cursor ON/OFF control bit

When C = "High", cursor is turned on.

When C = "Low", cursor is disappeared in current display, but I/D register remains its data.

B: Cursor Blink ON/OFF control bit

When B = "High", cursor blink is on, that performs alternate between all the high data and display character at the cursor position.

When B = "Low", blink is off.

Cursor or Display Shift

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
0	0	0	0	0	1	S/C	R/L	*	*

Without writing or reading of display data, shift right / left cursor position or display.

This instruction is used to correct or search display data. (Refer to Table 4)

During 2 – line mode display, cursor moves to the 2nd line after 40th digit of 1st line.

Note that display shift is performed simultaneously in all the line.

When displayed data is shifted repeatedly, each line shifted individually.

When display shift is performed, the contents of address counter are not changed.

S/C	R/L	Operation
0	0	Shift cursor to the left, AC is decreased by 1.
0	1	Shift cursor to the right, AC is increased by 1.
1	0	Shift all of the display to the left, cursor moves according to the display.
1	1	Shift all of the display to the right, cursor moves according to the display.

Messrs. Standard					
Product Specification	Model	NMTC-S16100XFYHSAY-16	Rev. No.	Issued Date.	Page.
			A	Sept. 05, 17	17 / 28

Function Set

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
00	0	0	0	1	DL	N	F	*	*

DL: Interface data length control bit

When DL = "High", it means 8-bit bus mode with MPU.

When DL = "Low", it means 4-bit bus mode with MPU. So to speak, DL is a signal to select 8 – bit or 4 – bit bus mode. When 4 – bit bus mode, it needs to transfer 4 – bit data by two times.

N: Display line number control bit

When N = "Low", it means 1 – line display mode.

When N = "High", 2 – line display mode is set.

F: Display font type control bit

When F = "Low", it means 5 X 8 dots format display mode

When F = "High", 5 x11 dots format display mode.

Set CG RAM Address

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
0	0	0	1	AC5	AC4	AC3	AC2	AC1	AC0

Set CGRAM address to AC.

This instruction makes CGRAM data available from MPU.

Set DD RAM Address

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
0	0	1	AC6	AC5	AC4	AC3	AC2	AC1	AC0

Set DDRAM address to AC.

This instruction makes DDRAM data available from MPU.

When 1 – line display mode (N = 0), DDRAM address is from "00H" to "4FH".

In 2 – line display mode (N = 1), DDRAM address in the 1st line is from "00H" to "27H", and DDRAM address in the 2nd line is from "40H" to "67H".

Read Busy Flag and Address

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
0	1	BF	AC6	AC5	AC4	AC3	AC2	AC1	AC0

This instruction shows whether ST 7066 is in internal operation or not. If the resultant BF is High, it means the internal operation is in progress and you have to wait until BF to be Low, and then the next instruction can be performed. In this instruction you can read also the value of address counter.

Messrs. Standard					
Product Specification	Model	NMTC-S16100XFYHSAY-16	Rev. No.	Issued Date.	Page.
			<i>A</i>	<i>Sept. 05, 17</i>	18 / 28

Write Data to RAM

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
1	0	D7	D6	D5	D4	D3	D2	D1	D0

Write binary 8 – bit data to DDRAM / CGRAM.

The selection of RAM from DDRAM, CGRAM, is set by the previous address set instruction: DDRAM address set, CGRAM address set. RAM set instruction can also determine the AC direction to RAM. After write operation, the address is automatically increased/decreased by 1, according to the entry mode.

Read Data to RAM

RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0
1	0	D7	D6	D5	D4	D3	D2	D1	D0

Read binary 8 – bit data from DDRAM / CGRAM.

The selection of RAM is set by the previous address set instruction. If address set instruction of RAM is not performed before this instruction, the data that read first is invalid, because the direction of AC is not determined.

If you read RAM data several times without RAM address set instruction before read operation, you can get correct RAM data from the second, but the first data would be incorrect, because there is no time margin to transfer RAM data.

In case of DDRAM read operation, cursor shift instruction plays the same role as DDRAM address set instruction : it also transfers RAM data to output data register. After read operation address counter is automatically increased / decreased by 1 according to the entry mode. After CGRAM read operation, display shift may not be executed correctly.

Note: In case of RAM write operation, after this AC is increased / decreased by 1 like read operation. In this time, AC indicates the next address position, but you can read only the previous data by read instruction.

12. RELIABILITY TEST

No	Item	Conditions		Note
1.	High Temp. Operation	70°C	240 HR	--
2.	High Temp. Storage	80°C	240 HR	--
3.	Low Temp. Operation	-20°C	240 HR	--
4.	Low Temp. Storage	-30°C	240 HR	--
5.	High Temp. / Humid Storage	60°C 90% RH	240 HR	--
6.	Thermal Shock	-20°C, 30min +60°C, 30min	10 cycles	--
7.	Vibration Test (IEC – 68 – 2 – 6)	Frequency: 10~55 Hz Duration: 20 times, 6 min / time Amplitude: 0.75 mm	--	--
8.	Shock (IEC 68 – 2 – 27)	Duration: 11 mS Acceleration: 100g	--	X, Y, Z direction

13. APPEARANCE CHECK

CONDIITON OF APPEARANCE CHECK:

- Specimen shall be checked by eyes in distance of 30cm under 40w – fluorescence lamp.
- Checking direction shall be in 45 degree from perpendicular line op specimen surface.

Messrs. Standard					
Product Specification	Model	NMTC-S16100XFYHSAY-16	Rev. No.	Issued Date.	Page.
			<i>A</i>	<i>Sept. 05, 17</i>	24 / 28

14. **HANDLING PRECAUTIONS**

- (1) Treat polarizer very carefully since it is easy to be damaged.
- (2) When cleaning the display surface, use soft cloth (e.g. gauss) with a solvent (recommended below) and wipe lightly.
 - ◆ ethyl alcohol
 - ◆ iso – procolol

Do not wipe the display surface with dry or hard materials that will damage the polarizer surface.

Do not use the following solvents:

- ◆ water
- ◆ ketone
- ◆ aromatics

- (3) Direct current causes electro-chemical reaction with remarkable degradation of the display quality. Give careful consideration to prevent direct current at ON/OFF timing and during operation.
- (4) Avoid strong shock and drop from the height.
- (5) To prevent LCD panels from degradation, do not operate or store them exposed directly to sunshine or high temperature / humidity.
- (6) Give careful consideration to avoid electrical static discharge with causes uneven contrast.
- (7) Even a small condensation on the contact pads (terminals) causes electro-chemical reaction which makes missing row and column. Give careful attention to avoid condensation.
When assembling with zebra connector, clean the surface of the pads with alcohol and keep the air very clean.

16. **WARRANTY**

This product has been manufactured to your company's specifications as a part for use in your company's general electronic products. It is guaranteed to perform according to delivery specifications. For any other use apart from general electronic equipment, we cannot take responsibility if the product is used in medical devices, nuclear power control equipment, aerospace equipment, fire and security systems, or any other applications in which there is a direct risk to human life and where extremely high levels of reliability are required. If the product is to be used in any of the above applications, we will need to enter into a separate product liability agreement.

- 1 13 months guarantee starts from the date code.
- 2 We cannot accept responsibility for any defect, which may arise from additional manufacturing of the product (including disassembly and reassembly), after product delivery.
- 3 We cannot accept responsibility for any defect, which may arise after the application of strong external force to the product.
- 4 We cannot accept responsibility for any defect, which may arise due to the application of static electricity after the product has passed your company's acceptance inspection procedures.
- 5 We cannot accept responsibility for industrial property, which may arise through the use of your product, with exception to those issues relating directly to the structure or method of manufacturing of our product. Microtips-origin longer than one year from Microtips production.

Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
