

- Continuous format heat-shrinkable identification tubing
- Computer printable
- Military specification material and print performance
- -55°C to 135°C operating temperature
- 3:1 shrink ratio
- CSA certified, UL recognised (VW-1 rated)

TTMS

Flat heat-shrinkable identification tubing

TTMS tubing is flattened, heat-shrinkable tubing intended for wire and cable identification. Available in continuous spools, TTMS tubing is designed for computer-based printing using Raychem's TMS 2000Plus printer. This product format makes TTMS identification tubing ideal for applications where in-sequence kitting is not of overriding importance, for example where several hundred identical markers are required. Large pack sizes, usually 100m (328 feet), minimise the number of spool

changes necessary during production runs.

TTMS identification tubing is made from durable, flame retarded, radiation-crosslinked heat-shrinkable polyolefin. The printed tubing meets the mark permanence requirements of MIL-DTL-23053/5 classes 1 and 3. The identification marks are permanent immediately after printing and remain legible even when exposed to solvents, fuels and oils. The tubing meets the mark permanence requirements of MIL-M-

81531 and MIL-STD-202 both before and after shrinking. Raychem-recommended ribbons should always be used. The tubing has a 3:1 shrink ratio (except sizes 38.1 and 50.8, which are 2:1) and cover a wide range of wire diameters, thus simplifying inventory. The tubing shrinks extremely rapidly, so installation is fast and economical. The installed markers are low profile and lightweight. They may be used to provide strain relief and insulation in addition to identification.

Temperature rating

Operating temperature range	-55°C to 135°C
Minimum recovery temperature	85°C
Maximum storage temperature	40°C

Specifications and approvals

Typical TTMS performance

refer to Raychem specification RW-2025 for details

	Property	Performance	Test method
Physical	Tensile strength	10.3MPa (1500psi) minimum	MIL-DTL-23053, section 4.6.13
	Ultimate elongation	200% minimum	MIL-DTL-23053, section 4.6.13
	Longitudinal change	0 to -20% maximum	MIL-DTL-23053, section 4.6.4
	Specific gravity	1.35 maximum	ASTM D 792
	Heat aging 168 hours at 175°C (347°F)	Minimum 100% ultimate elongation Print legible after 50 rubs	MIL-DTL-23053, section 4.6.9 See RW-2025
	Heat shock 4 hours at 250°C (482°F)	No cracking, dripping or flowing Print legible	MIL-DTL-23053, section 4.6.8 See RW-2025
	Print performance	Print legible after 50 rubs Print legible after 30 strokes	MIL-M-81531, section 4.6.2 MIL-STD-202, method 215
Electrical	Dielectric strength	19.7 kV/mm (500V/mil) minimum	ASTM D 2671
Chemical	Flammability	No flaming or glowing after 1 minute 25% maximum flag burn No burning of cotton; no dripping	ASTM D 2671, procedure B ASTM D 2671, procedure C ASTM D 2671, procedure C
	Fungus resistance	Rating 1 maximum Original tensile properties retained	ASTM G 21 ISO 846 B
	Corrosive effect 16 hours at 175°C (347°F)	Non-corrosive (copper contact) No pitting or blackening (copper mirror)	MIL-DTL-23053, section 4.6.10.1 MIL-DTL-23053, section 4.6.10.2
	Fluid resistance 24 hours at 24°C (75°F)	Print legible after 20 rubs Dielectric strength 15.8kV/mm min Tensile strength 6.9Mpa min	MIL-M-81531, section 4.6.2 ASTM D 2671 MIL-DTL-23053, section 4.6.13

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
