

MAX14724PMB1 Peripheral Module

Evaluates: MAX14724

General Description

The MAX14724PMB1 peripheral module provides the necessary hardware to interface the MAX14724 8:4 matrix switch multiplexer to any system that utilizes Pmod™-compatible expansion ports configurable for I²C or SPI communication. The IC can be powered from a single 1.6V to 5.5V supply or dual ±2.5V supplies. The device features an 8:4 multiplexer that every switch combination can be selected through using I²C or SPI. Refer to the MAX14724 IC data sheet for detailed information regarding the operation of the IC.

Features

- 8:4 Matrix Switch Multiplexer
- 50Ω Controlled-Impedance Signal Traces
- 12-Pin Pmod-Compatible Connector
- Proven PCB Layout
- Fully Assembled and Tested

EV Kit Contents

- Peripheral module containing a MAX14724

Ordering Information appears at end of data sheet.

MAX14724PMB1 Peripheral Module

Evaluates: MAX14724

Detailed Description

The MAX14724PMB1 peripheral module provides a convenient way to evaluate the MAX14724 multiplexer. All PCB signal traces are 50Ω controlled impedance to allow

easy impedance matching. The device can be programmed by using I²C or SPI.

The J1 connector provides connection to NO_ ports (see [Table 1](#)), while the J2 connector provides connection to COM_ ports (see [Table 2](#)).

The MAX14724PMB1 can interface to the host by plugging directly into a Pmod-compatible port (configured for I²C or SPI) through connector J3 (see [Table 3](#)).

Table 1. Connector J1

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
