THE FASTEST WAY TO WIRELESS

ConnexLink™ stand-alone radio modules are set up in minutes to cut the cables between RS232 or RS485 devices. Their flexibility and economic price allow users to quickly upgrade wired terminals to cordless operation in industrial, commercial, and residential applications.

Powered by a 100mW 2.4GHz radio or a 1000mW 900MHz radio, each unit is small and easily portable for use in mobile and temporary settings, as well as fixed installations. Optional software enables custom configurations based on user needs.

ConnexLink implements a proprietary communication protocol to provide secure local data transmissions. Because it uses FHSS technology, the data remains reliable over distances of up to 20 miles (32 km) line-of sight (900MHz version). Use of license-free frequency bands ensures that units are ready to use with no further certification requirements. Every unit is backed by a full one-year warranty.

ConnexLink radio modules provide simple elimination of cables with a wireless link replacement. Every unit is backed by a full one year warranty.

FEATURES

- Durable industrial-grade enclosure
- Transmits around corners, through walls
- Point-to-point and point-to-multipoint setups
- Extremely cost effective
- Up to 20 mile range
- Simple Cable Replacement
- Options for 910 MHz and 2.46 GHz

MARKETS

- Weigh Scales
- Process Control
- Kiosks and POS
- Data Logging
- Electronic Signs

FLEXIBLE RF PROTOCOL

Laird Technologies' embedded transparent protocol simplifies the integration process by allowing seamless plug-and-play installation. As each unit receives raw data, it manages over-the-air protocol to assure successful communication. Headers, data packet length, and CRCs are not required. RF232 supports simple cable-replacement up to complex peer-to-peer setups. Broadcast communication to all devices or address packets to a specific destination using unique MAC addresses embedded in each unit.

PROTOCOL FEATURES

Features vary by product. Ask a Laird Technologies representative to explain why some features are particular to CL4424, CL4790 or CL4490.

RF PROTOCOL MODES

- a) Communication
 - Unicast (one-to-one addressing)
 - Broadcast (one-to-multiple addressing)
- b) Acknowledgement mode (ACK)
 - API with software ACK indication
- c) Handshaking (only on CL4790, CL4490),
 - CTS/RTS, modem mode
- d) Variable baud rates
- e) Long range mode
 - (only on CL4790, CL4490)
 - Enables sensitivity control
- f) In-range/session indicator
- g) DES encryption
 - (only on CL4790, CL4490)
- h) Raw data or transmit/receive API
 - (only on CL4790, CL4490)
- i) Radio Module configuration:
 - Destination address
 - RF transmit power
 - RF channel
 - Broadcast/addressed
- j) 9-bit serial interface mode

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
